Medical Report

PATIENT	DOB
Fridrich Kubička	22/02/1968
DATE OF VISIT / ADMISSION	DISCHARGE
18/04/2026	—
DIAGNOSIS	ICD-10
Sprain of the ankle	S93.4

History

No relevant previous illnesses. No regular medication.

Findings and treatment

Physical examination revealed tenderness over the lateral aspect of the right ankle with mild swelling and limited range of motion. No deformity or instability was noted. X-ray of the ankle was performed and showed no evidence of fracture or dislocation. The patient was treated with ice, compression, and elevation, along with prescription of nonsteroidal anti-inflammatory medication. The patient was advised to avoid weight-bearing activities and to follow up in one week for reassessment.

Attending physician: Toby Lewis
